INDEX TO VOLUME XCVIII

Alphabetical Table of Contents of Authors

ADKISSON, P. L., Action of the photoperiod in controlling insect diapause, 357

AMERICAN SOCIETY OF NATURALISTS, Reports of the Secretary, Treasurer, and Editor, 253

ANDERSON, PAUL K., L. C. DUNN and ANDREW B. BEASLEY, Introduction of a lethal allele into a feral house mouse population, 57

BARR, H. J., Regeneration and natural selection, 183

BEASLEY, ANDREW B., See PAUL K. ANDERSON

BECK, STANLEY D., Time-measurement in insect photoperiodism, 329

BENNETT, DOROTHEA, Selection toward normality in genetically tailless mice, and some correlated effects, 5

BORTHWICK, H. A., Phytochrome action and its time displays, 347

BRACE, C. LORING, The probable mutation effect, 453

BRINK, R. ALEXANDER, Genetic repression in multicellular organisms, 193

BURNS GAIL, See RAE WHITNEY

CONNELL, JOSEPH, and EDUARDO ORIAS, The ecological regulation of species diversity, 399

CROW, JAMES F., More on the heterozygous effects of lethals in Drosophila populations, 447

CROW, JAMES F., and RAYLA GREENBERG TEMIN, Evidence for the partial dominance of recessive lethal genes in natural populations of Drosophila, 21

DAMIAN, RAYMOND T., Molecular mimicry: antigen sharing by parasite and host and its consequences, 129

DANIEL, JOSEPH C., JR., Early growth of rabbit trophoblast, 85

DAWSON, PETER S., and ALEXANDER SOKOLOFF, A multiple allelic series in *Tribolium castaneum*, 455

DERMEN, HAIG, The question of colchicine induced somatic reduction and the production of homozygous diploid mutants in sorghum, 105

DOBZHANSKY, THEODOSIUS, How do the genetic loads affect the fitness of their carriers in Drosophila populations, 151

More on mutation rates and on heterozygous effects of lethals, 449

DRESCHER, W., The sex limited genetic load in natural populations of *Drosophila melanogaster*, 167

DUNN, L. C., See PAUL K. ANDERSON

FARNER, DONALD S., Time measurement in vertebrate photoperiodism, 375

FOWLER, JAMES A., The *Rana pipiens* problem, a proposed solution, 213

FRANK, PETER W., On home range of limpets, 99

HAILMAN, JACK P., Breeding synchrony in the equatorial swallow-tailed gull, 79

HAMNER, K. C., and A. TAKIMOTO, Circadian rhythms and plant photoperiodism, 295

HILLMAN, WILLIAM S., Endogenous circadian rhythms and the response of *Lemna perpusilla* to skeleton photoperiods, 323

HOCHACHKA, PETER W., The physiological measure of competition, 117

HUNGERFORD, DAVID A., and ROBERT L. SNYDER, Karyotypes of two more mammals, 125

JAIN, S. K., See B. C. JOSHI

JOSHI, B. C., and S. K. JAIN, Clinal variation in natural populations of *Justicia simplex*, 123

KEZER, JAMES, See TAKESHI SETO

KLOPFER, PETER, Parameters of imprinting, 173

LLOYD, MONTE, Weighting individuals by reproductive value in calculating species diversity, 190

MacARTHUR, ROBERT H., Environmental factors affecting bird species diversity, 387

MAINX, F., The genetics of *Megaselia scalaris* Loew (Phoridae): a new
